1. Coast Defenses at Miedzyzdroj (Misdroy) on Wolin Island

- a. Work is under way at present on the coastal battery which is located 3,000 meters east of the Miedzyzdroj breakwater. It is being done by men of the battery assisted by a detachment of the 5th Engineer Regiment from Szczecin. The unusual amount of activity of trucks with trailers indicates that the work is very important.
- b. Watch towers spaced about two kilometers apart have been built along the coast of Wolin island. At night the beach is patrolled by WOP men. Daily between 18 and 19 hours a two-seater Soviet aircraft flies over the coast at a very low altitude. (about 100 meters).

2. Ship Yards and Ports

All naval ship construction for Poland was stopped at the naval shipyard at Gdansk in order to concentrate on production for the USSR. Numerous Soviet technicians are working in this yard. Because of the sabotage which occurred at Elblag at the beginning of September, supervision and inspection has been increased there and in all the Polish coastal ports.
